

Find Your Turtle

Just like Minn came from an egg, it's time for you to find an egg with a turtle in it!

Birth Certificate

Now that you've found your turtle, it's time to name it! There are lots of names you can choose from. Minn was named after the state Minnesota where he started from. You could do the same.

Or you could make a name like the author of the book where the first and last name is the same!

Once you choose a name, fill out the birth certificate. If you want to write the name or initials on top of your turtle, use one of these markers.

Make a Turtle

Here are some snacks, before you eat them, figure out a way to make a turtle or a few turtles!!

Gulf of Mexico

When Minn got to the Gulf of Mexico it was too salty! The Mississippi River's water is not salty. Salty water is not where Minn can live. Take a spoon and try a little of this water. Is it like the water in the Mississippi River (fresh) or like the Gulf of Mexico (salty)?
